

CANCER RESEARCH SUMMER VACATION STUDENTSHIPS 2018-2019

Applications close at 5pm on Friday 21 September 2018

Cancer Council Victoria is an independent volunteer based charity which was established in 1936. Our mission is to lead the fight against cancer. Our core business is cancer control. We conduct and support research as well as delivering state-wide support and prevention programs and advocating regulation and other interventions to reduce the physical and emotional burden of cancer.

Applications are now open for summer vacation studentships for undergraduate students enrolled in relevant disciplines at any Victorian university.

STUDENTSHIP DETAILS

Remuneration: \$300 per week

Duration: maximum of six weeks during the summer vacation

The studentship project needs to be part of a cancer research program being conducted at a university, clinical or other research organisation. Intending applicants need to contact a cancer researcher and ask if they have a project available that they would be willing to supervise. A list of researchers currently funded by Cancer Council Victoria, and the projects they are working on, is available on our website http://www.cancervic.org.au/research/biomedical/grants-in-aid_recipients

The application guidelines and form are available at http://www.cancervic.org.au/research/biomedical/research_sum_vacation_studentships or contact
