

## Clinical trials are a part of best practice care

Clinical trials have strict guidelines to make sure the people and procedures in clinical trials are as safe as possible. All people being treated in a clinical trial will be closely monitored, like they would if they were not in a clinical trial.

**For more information about clinical trials or to search for a clinical trial in Victoria, visit [www.cancervic.org.au/trials](http://www.cancervic.org.au/trials)**
